## FEATURES

**2nd / 3rd hole available** The sink can be customized with the execution on request of additional holes, usable for double-hole mixers, for remote controlled drains or for the installation of soap dispensers. The positions are marked on the drawings with dotted line holes.

---

**Added value** Foster uses steel thicknesses higher than those used on average by other manufacturers. This is how, thanks to our long experience, we know how to make sinks of superior quality and with a better resistance to aging.

---

**Basket 3,5" waste fitting** The drain is equipped with a large 3.5" drain, with the practical basket cap that prevents the discharge of solid parts.

---

**Gun Metal** The Gun Metal finish is obtained by treating steel with a physical process called PVD (Physical Vacuum Deposition) which deposits particles of noble metals on the surface. The result is a unique and refined aesthetic effect, and an improvement of the mechanical properties of the steel which is more resistant to impact and scratches.
